

Ideal for pain care applications

Innovative Contour Design Top: Biodex C-Arm tables feature a uniquely contoured tabletop. This design fully accommodates C-Arm positioning for closest possible access to the cervical spine, achieving optimum image resolution. A second benefit to the contour design is the added workspace at the head end, while maintaining the narrowness required for cervical procedures.

C-Arm Table - 870

Pain Management Table

Accommodates
BARIATRIC
Patients

Innovative design optimizes patient access, increases imaging resolution and saves space.

- Low attenuation carbon fiber tabletop, with innovative contour design
- High-speed actuators assure quick, three axis motorized tabletop positioning
- Convenient positioning controllers
- Smooth starts and stops programmed into all motorized movements
- 500-lb patient capacity
- Face cutout for comfortable prone positioning
- Low profile base for C-Arm clearance
- Accessory rails

Featuring a large radiolucent area, motorized actuation of height, lateral roll and Trendelenburg motions, the Pain Management C-Arm Table is ideal for pain care applications.

Automatic positioning

A portable hand-held controller and optional foot-operated controller can be positioned for convenient access from any point around the table. The portable hand-held and optional foot-operated controllers offer the freedom to adjust height, lateral roll, and Trendelenburg motions from locations away from the table, or when hands are busy with other functions. The hand-held controller hangs on an accessory rail when not in use.

Accommodates portable or ceiling-suspended C-Arms

Designed for procedures where stability, access, and precise, quiet, vibration-free positioning are essential, the Pain Management C-Arm Table is excellent for image-guided procedures. A cantilevered low attenuation carbon fiber tabletop accommodates portable or ceiling-suspended C-Arms. The radiolucent area is free of cross members, allowing full fluoroscopic visualization and unobstructed C-Arm positioning. Functional design provides complete access with reduced radiation exposure to clinicians. Patient comfort and stability are assured by two-inch thick table padding and three adjustable straps with hook and loop fastening. A face cutout is provided for prone positioning.

Specifications and models listed inside back cover.

As required by law, all Biomed C-Arm tables are CDRH registered and FDA Device Listed. All motorized tables are ETL product listed to the UL-60601-1 Medical Electrical Equipment Safety Standard.
