BIODEX

Accommodates BARIATRIC Patients

All motorized tables are ETL product listed to the UL-60601-1 Medical Electrical Equipment Safety Standard.

**BIODEX MEDICAL** 

## Sonographer-friendly design that maximizes patient comfort

- Ergonomic design helps prevent musculoskeletal injuries comfortable shoulder, arm and hand positions when scanning
- Allows seated or standing work positions
- 500-lb patient capacity, suitable for bariatric patients
- Height range down to 23" accommodates wheelchair transfers and those with ambulatory difficulties.
- Motorized height, Fowler back, Trendelenburg and auto level adjustment
- Hand controller actuates table positions
- Retractable stirrups extend extra long for larger patients
- Optional scanning arm board mounts to either side of table
- Optional side rails fold out of the way to allow unobstructed patient access

he Ultra Pro Ultrasound Table is a dedicated table for all ■ general ultrasound procedures including OB/GYN. Choose from an assortment of table options to customize the table to suit your department needs, the table is ergonomically designed to suit both patient and sonographer. The table is so accommodating, it reduces the total amount of time required to achieve a quality image.

There are no barriers between sonographer and patient, allowing correct scanning posture to prevent musculoskeletal injury. The open frame design allows sonographers to get closer to the patient, especially useful for carotid imaging or long leg arterial scanning. The motorized Fowler back is infinitely adjustable up to 80° via hand or optional foot controller. The leg section drops down to 40° for patients with circulatory issues and 80° for stirrup access. Five-inch locking swivel casters and a central locking system, accessible from either side of the table, secure table position.

See Specifications and Models on page 15.

Central floor locking system secures table position and is accessible from either side of the table. Leg section drops down for access to retractable stirrups (optional).

## SUITABLE PROCEDURES:

- Abdomen
- Aorta
- Endovaginal\*\*
- Hysterosonography
- Testicular
- Musculoskeletal
- DVT/Lower Extremity Venous
- Upper Extremity Arterial\*
- Renal Transplant
- SMA

- Renal
- Pelvis
- OB
- Thyroid
- Breast
- Carotid
- Lower Extremity Arterial
- Renal Artery
- Abdominal Doppler
- Transesophogeal Echo
- \*Requires optional vascular arm board.
- \*\*Requires optional stirrups.

More than 80% of sonographers are scanning in pain and 20% of these professionals eventually experience a career-ending injury. On average, within five years of entering the profession, sonographers experience pain while scanning.
