

Accommodates echocardiography procedures.

Accommodates
BARIATRIC
Patients

All motorized tables are ETL product listed to the UL-60601-1 Medical Electrical Equipment Safety Standard.

BIODEX MEDICAL

Our premium echocardiography table features easy positioning and advanced ergonomic engineering

- Ergonomic design helps prevent musculoskeletal injuries – comfortable shoulder, arm and hand positions when scanning
- Allows seated or standing work positions
- Extra wide top with 500-lb patient capacity, suitable for bariatric patients
- Height range down to 23" accommodates wheelchair transfers and those with ambulatory difficulties
- Motorized height, Fowler back, Trendelenburg and auto level adjustment
- Swing-out cardiac scanning cutout doubles as armrest
- Adjustable sonographer cutout for maximum patient access and comfortable scanning positioning
- Vascular scanning arm board mounts to either side of table

Cardiac Scanning Cutout with pivoting cushion doubles as an armrest. Adjustable Sonographer Cutout drops down or folds up for maximum patient access.

There are no barriers between sonographer and patient on the Echo Pro table, allowing correct scanning posture to prevent musculoskeletal injury. The cardiac scanning cutout provides open access to the patient's left thorax area for an unobstructed apical approach. The motorized Fowler back is infinitely adjustable to 80° via hand or foot controller.

The Echo Pro Combination Table is so accommodating it reduces the total amount of time required to achieve a quality image. Patient comfort is assured even through lengthy procedures by cushioned arm supports, a thick mattress and a unique swing-out cardiac scanning cutout cushion that doubles as an armrest.

See Specifications and Models on page 14.

SUITABLE PROCEDURES:

- Abdomen
- Aorta
- Thyroid
- Breast
- Carotid
- Venous Reflux*
- Lower Extremity Arterial
- Upper Extremity Arterial**
- Renal Transplant
- SMA
- Stress Echo
- Renal
- Pelvis
- Testicular
- Musculoskeletal
- DVT/Lower Extremity
- Venous*
- Upper Extremity Venous**
- Renal Artery
- Abdominal Doppler
- Echocardiography
- Transesophageal Echo

* Requires optional foot support

** Requires optional vascular arm board

More than 80% of sonographers are scanning in pain and 20% of these professionals eventually experience a career-ending injury. On average, within five years of entering the profession, sonographers experience pain while scanning.
