

Full equipped for OB/GYN, general ultrasound and echocardiography.

Accommodates
BARIATRIC
Patients

All motorized tables are ETL product listed to the UL-60601-1 Medical Electrical Equipment Safety Standard.

BIODEX MEDICAL

Combines the premium features of our popular Ultra Pro and Echo Pro tables to meet your every need

- Ergonomic design helps prevent musculoskeletal injuries – comfortable shoulder, arm and hand positions when scanning
- Allows seated or standing work positions
- Extra wide top with 500-lb patient capacity, suitable for bariatric patients
- Height range down to 23" accommodates wheelchair transfers and those with ambulatory difficulties.
- Motorized height, Fowler back, Trendelenburg and auto level adjustment
- Swing-out cardiac scanning cutout doubles as armrest
- Adjustable sonographer cutout for maximum patient access and comfortable scanning positioning
- Vascular scanning arm board mounts to either side of table

Cardiac scanning cutout features a patented swing-out cushion that doubles as an armrest. Vascular scanning arm board can be mounted to either side of the table.

The Sound Pro Combination Table combines the imaging features of both the Ultra Pro and Echo Pro tables. Fully equipped for OB/GYN, general ultrasound and echocardiography, this extra wide table is ergonomically designed for both patient and sonographer.

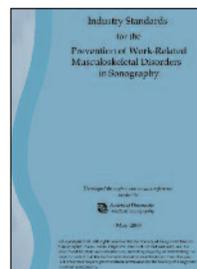

The fold away side rails and adjustable sonographer cutout cushion allow comfortable shoulder, arm and hand positions when scanning. There are no barriers between sonographer and patient, allowing correct scanning posture to prevent musculoskeletal injury. The cardiac scanning cutout provides open access to the patient's left thorax area for an unobstructed apical approach. The motorized Fowler back is infinitely adjustable to 80° via hand or foot controller.

The Sound Pro Combination Table is so accommodating, it reduces the total amount of time required to achieve a quality image. Stress patients are off the treadmill and quickly onto the table in imaging position. Patient comfort is assured even through lengthy procedures by cushioned arm supports, a thick mattress and a multitude of comfort-driven design details. The unique swing-out cardiac scanning cutout cushion doubles as an armrest, while the leg section drops down to 40° for patients with circulatory issues.

See Specifications and Models on page 14.

SUITABLE PROCEDURES:

- Abdomen
- Aorta
- Endovaginal
- Hysterosonography
- Testicular
- Musculoskeletal
- DVT/Lower Extremity Venous
- Venous Reflux
- Upper Extremity Arterial
- Renal Transplant
- SMA
- Stress Echo
- Renal
- Pelvis
- OB
- Thyroid
- Breast
- Carotid
- Lower Extremity Arterial
- Upper Extremity Venous
- Renal Artery
- Abdominal Doppler
- Echocardiography
- Transesophageal Echo

More than 80% of sonographers are scanning in pain and 20% of these professionals eventually experience a career-ending injury. On average, within five years of entering the profession, sonographers experience pain while scanning.
